What is a Bootcamp?

DATA ANALYTICS | IRONHACK

Agenda

1. **Meet the pack**
2. Essential tasks
3. Social norms

What is a Bootcamp? | Meet the pack

#1: What should we call you?

#2: What do you do for a living?

#3: Relevant background (i.e.: technical experience).

#4: What are your expectations?

#5: How did it go with the pre-work?

#6: Which resources do you have access to?

#7: What's your level of English?

Meet the pack.

What is
Data?

Data is a broad concept which can be understanded, technically speaking, from different perspectives. During the next 6 months you will gain understanding of different concepts regarding data such as: ***structured vs. unstructured data***, ***big data***, ***data modeling***, ***traditional analytics***, ***advanced analytics***, etc., and some basic skills and technologies centered at this concepts.

Learning by **doing**

There are no shortcuts. Nowadays learning implies concepts that traditional education didn't care too much about like: *practice (labs, challenges, projects) over content (lessons)*, *software literacy*, *functional and technical English*, *lifelong learning (googling, stackoverflow, documentation)*.

Help us **help you**

There are no grades, but we need to know what's going on in order to maximize the effectiveness of the learning process. For that matter, ***Teacher Assistants*** are the key stakeholders.

Find your
own pace

Comparison is the thief of joy. As we just saw, we have different backgrounds, experiences, expectations and even resources. That's why it is important to move together towards our own individual goals and enjoy the journey because is a long one.

Agenda

1. Meet the pack
2. Essential tasks
3. **Social norms**

What is a Bootcamp? | Social norms

#1: *Attendance.* 73 days in 24 weeks ~ 240h + 48h
